EDUCATION

KU Leuven | *Exchange Program*

Sept. 2025 – Jan. 2026

Artificial Intelligence

Leuven, Belgium

- Completed master's-level AI coursework with excellent results in advanced machine learning, uncertainty, privacy, and evolutionary computation.

Polytechnic University of Catalonia (UPC) | *Bachelor of Science*

Sept. 2022 – Present

Artificial Intelligence GPA: 9.10 / 10.

Barcelona, Spain

- 7 honour distinctions in courses such as NLP, Computer Vision, Reinforcement Learning, Data Analysis.
- Mentor for first-year students.
- Governmental Distinction for University Entry Exam (selectivity) | score: 9.5+/10.

EXPERIENCE

Computer Vision Center (CVC)

Feb. 2026 – Present

Research Intern | *LAMP Group*

Barcelona, Spain

- Developing my Bachelor's Thesis on catastrophic forgetting in foundation models through a mechanistic interpretability lens.
- Studying representation drift in OpenCLIP using LoRA adaptation, pre-trained Sparse Autoencoders, and post-hoc steering interventions.
- Awarded the highly competitive Elena Maseras Fellowship (2026).

Serimag

Feb. 2025 – Jul. 2025

AI Researcher Intern | *Document AI*

Barcelona, Spain (Hybrid)

- Pioneered the company's shift to trainable Vision-Language Models, architecting an end-to-end system to move beyond prior rule-based extraction methods.
- Engineered a tailored fine-tuning pipeline leveraging LoRA and memory optimization, enabling training on resource-constrained hardware.
- Designed a probabilistic validation framework with meta-classifiers on model log-probabilities, meeting a 98% accuracy requirement for high-sensitivity banking documents.

PROJECTS

IpurdIars: Tactical Football Agent | *Hackathon Project*

Mar. 2026

- Winner of Barça Innovation Hack 2026 (first prize among 3,500+ applicants).
- Developed an AI ecosystem that transforms raw tracking coordinates and match commentary into a tactical conversational agent for real-time coaching support.

CatGPT: Catalan LLM | *Personal Project*

2024

- Developed a 111M-parameter Catalan language model from scratch to address low-resource data scarcity, achieving strong performance in generation tasks.
- Released base and instruction-tuned variants, with careful data curation and synthetic token strategies.

LaIA: Multimodal Administrative Assistant | *Hackathon Project*

Nov. 2024

- Winner of AINA Hack 2024 (Projecte Aina, Barcelona Supercomputing Center).
- LaIA is a multimodal assistant for Catalan public administration: accepts documents/images, performs retrieval-augmented understanding, OCR-robust document parsing, and generates step-by-step textual and video guides (includes TTS and auto-filled templates) to simplify citizen administrative workflows.

TECHNICAL SKILLS

Programming Languages: Python, R, MATLAB, SQL, C, C++, PDDL.

Skills: Machine and Deep Learning, Reinforcement Learning, NLP, Computer Vision, AI agents, Parallelization, CUDA, Cloud Computing, GenAI.

Frameworks and Libraries: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib.

Languages: Catalan (Native), Spanish (Native), English (Advanced Level, C1 Cambridge Advanced).

Courses: Generative AI with LLMs (DeepLearning.AI & AWS, Coursera)
